green roofs

extensive
Ranging in weight from 8-12 lbs/ft² saturated depending on the hardiness zone of the project.

intensive
Green Roof applications involving patios, retaining walls, walkways, deeper depths of growth medium and diverse planting requirements.

low sloped roofs
Roofs with a slope less than 25% use the ELT EasyGreen® Vegetation Carrier.

steep sloped
Roofs with a slope greater than 25% use ELT EasyGreen® Living Wall Panels.

living walls

The ELT EasyGreen® Living Wall System is revolutionizing both the landscaping and green build industries. Using our Green Roof experience, we have developed a product that is both practical and user friendly. It also has the flexibility to work in many different applications:

- Large Indoor Apps for Air Quality Purposes
- Outdoor Apps for Cooling Effects in Buildings & Artistic Value
- Indoor Applications
- Sound Barriers
- Do It Yourself Home Kits
